The General Meeting of shareholders of Resitape (or the «Company») approved the Company's economic and financial data for the year ended at 31 December 2021.

Resitape closed the year 2021 with growing turnover of +39% compared to 2020 and +14% compared to 2019. This achievement represents the best results in terms of turnover since the Company foundation.

Such a turnover positive performance reflects the growth of the key company business lines, also in a context affected worldwide by Covid.

This important result was mainly driven by Resitape best effort to always manage in particular five key elements the Company greatly cares for: customers, suppliers, employees, process and products.

The significant performance Resitape recorded will be a further incentive to continue on the Company's development path in Italy and abroad.
